C2R 2022 Talk-a-thon

Conversations to Remember is set to host our 2nd annual talk-a-thon during the 2022 holiday season to raise awareness of the issue of senior loneliness. We will also be encouraging young and old alike to reach out to the seniors in their life to let them know how special they are, and we'll be raising funds to help us reach more seniors with our visits

What is: Parkinson's Disease Dementia?

Parkinson's Disease Dementia is a form of dementia that can affect people who are already suffering from Parkinson's disease. The development of this condition starts in a part of the brain that is key to physical movement. As the disease progresses, some people begin to experience a decline in cognitive function, in addition to difficulty remembering things and paying attention.

Technology Update: C2R 2.0

Conversations to Remember has rolled out new software to support our volunteers in their virtual visit. Our new chat system makes it easier to join the right call, and allows volunteers to more easily request support during their visits.
